
e-Invoicing System

The Mauritius Revenue Authority (MRA) is introducing an **e-Invoicing System** at the national level, in a phase-wise approach. With this system, economic operators will be required to generate invoices or receipts, using an **Electronic Billing System (EBS)**, and fiscalise the details in real time with MRA before issuing those invoices or receipts to customers.

As a first step, EBS software developers and EBS solution providers are required to register, customise, test, and self-certify that their solutions are compliant with the MRA e-Invoicing technical specifications.

EBS software developers and solution providers are invited to **Sign Up** on the **MRA e-Invoicing Developer Portal** which is accessible on **MRA website**: www.mra.mu

Detailed information regarding the MRA e-Invoicing System is also available on the MRA website.

For further queries, you may phone the MRA e-Invoicing helpdesk on 207 6020 or send an email on: invoicing@mra.mu
